Dear Law Enforcement Administrator:

I am pleased to provide you with a copy of Wisconsin Crime and Arrests-1987. The first half of the report presents statewide information on crime and arrests and sections on individual serious crimes. The second half of the report contains detailed crime and arrest information for individual jurisdictions within the State, organized alphabetically by county.

Some of the more important findings are summarized at the beginning of the report. These include a slight rise in the number of crimes reported and a ten percent increase in total adult arrests (including substantial increases in cocaine-related offenses).

If you have any suggestions for improving the report in future years, please let me know. Our data processing system has undergone major changes this summer and we expect to make substantial revisions in this report next year. Also, if your Department requires additional copies of this report, please contact this office.

I would like to take this opportunity to thank you and all the members of your Department for the superb cooperation you have given the Wisconsin Uniform Crime Reporting (UCR) Program during past years. Your voluntary cooperation in compiling and submitting the various forms is essential in providing accurate crime information to the citizens of Wisconsin.

I hope you will contact our office whenever you need crime-related statistics or special reports for your own Department. Again, thanks for all your assistance during the past year.

Sincerely,

Ted Meekma

The Statistical Analysis Center

The Wisconsin Statistical Analysis Center is a program of the Wisconsin Office of Justice Assistance. The Center collects, analyzes, interprets and disseminates criminal justice data in Wisconsin.

In addition to the Uniform Crime Reporting Program, the Center currently operates two on-going statewide data collection programs. The Jail Information System (JIS) collects and analyzes jail data from participating counties in Wisconsin. The Juvenile Detention Information System (JDIS) collects and analyzes information on secure detention of juveniles in the state.

In addition to operating these programs, the Center also provides technical assistance to local criminal justice agencies. Further, it provides state and local government with access to federal criminal justice statistical information. The Statistical Analysis Center also promotes the coordination and development of criminal justice statistical systems in Wisconsin.

Crime and Arrests in Wisconsin - 1987

Introduction

This report, prepared by the Wisconsin Statistical Analysis Center (SAC), presents data on crime and arrests in Wisconsin during 1987. From 1970 through 1981 the state Uniform Crime Reporting (UCR) Program, operated by the Crime Information Bureau of the Wisconsin Department of Justice (DOJ), collected, compiled, and reported crime and arrest data for Wisconsin. Beginning in 1971, DOJ also provided data to the national UCR system, a program of the Federal Bureau of Investigation (FBI). Effective December 31, 1981, the state program operated by DOJ was discontinued. The 1981 data collected by DOJ were transmitted directly to the FBI, and the 1981 Wisconsin Crime and Arrests report, prepared by SAC, was based for the most part on information provided to SAC by the FBI. In 1982 and again in 1983 Wisconsin law enforcement agencies transmitted their UCR data directly to the FBI, but in addition provided copies of the the principal offense and arrest forms to the Statistical Analysis Center. As of 1984, Wisconsin resumed its status as part of the national UCR system. Since 1984, Wisconsin law enforcement agencies have provided complete UCR data to SAC, which in turn has transmitted the data to the FBI via computer tape.

The National UCR Program

The national Uniform Crime Reporting Program was initiated in 1930 by the International Association of Chiefs of Police (IACP). After soliciting input from law enforcement agencies throughout the country, an IACP committee developed uniform crime definitions and reporting procedures which could be used by law enforcement agencies in every state. The FBI was designated as the national clearinghouse for UCR data. The Committee on Uniform Crime Records of the IACP continues to serve the national program in an advisory capacity. In 1956, the National Sheriff's Association also established a Committee on Uniform Crime Reports to act as an advisory body to the program. The FBI regularly receives data on reported crime and arrests from law enforcement agencies throughout the country. The data are provided either by individual law enforcement agencies or by state UCR programs which collect and compile data for their states and convey the data to the FBI. From these data the FBI publishes its annual report, Crime in the United States.

The Wisconsin UCR Program

The FBI recognized the Wisconsin Council on Criminal Justice (WCCJ) as the administrator of the Wisconsin State Uniform Crime Reporting Program effective January 1, 1984. As indicated above, the original Wisconsin UCR program, operated by DOJ, was discontinued in 1981. The program operated by DOJ from 1970 through 1981 required that all law enforcement agencies submit UCR data either directly or through the county sheriff's office. It also required that DOJ submit the prescribed data to the FBI. DOJ expanded the national UCR program's classifications to collect more detailed and appropriate data on Wisconsin crime and arrests. From the statewide UCR data, DOJ published its annual report Wisconsin Crime and Arrests, as well as quarterly, semi-annual, and other summary reports.

In November, 1981, the Wisconsin Council on Criminal Justice (WCCJ) received a grant from the United States Department of Justice, Bureau of Justice Statistics, to develop the Wisconsin Statistical Analysis Center. The SAC was mandated by executive order to collect and analyze criminal justice data, produce statistical reports on crime and the justice system, and promote development of criminal justice information systems. From 1981 through 1983, SAC assumed a substantial number of the functions of the state UCR program to meet the information needs of state

and local criminal justice decision-makers, elected officials and interested citizens. As of January, 1984, Wisconsin once again has had a State UCR Program officially recognized by the FBI and part of the national system of state UCR programs.

Issues in Comparison of this Report with Earlier Reports

Care should be exercised in making comparisons of the data in this report with the data contained in previous annual reports. Adjustments may be required for the following reasons:

-- Shifting of a law enforcement agency from one population category to another based on annual re-estimation of the jurisdiction's population.

-- On occasion, the Federal Government designates an additional Wisconsin county as being included in a Standard Metropolitan Statistical Area. This would shift a Sheriff's Office from the Rural Areas category to the Suburban Sheriffs' group. (See footnote 5 on page 15 for a listing of Suburban Sheriffs' Offices.)

-- Populations are estimated for non-census years. Rates for 1987 are calculated using 1980 census data, updated with 1987 estimates published by the Demographic Services Center, Wisconsin Department of Administration.

-- County totals shown in Tables 1-9 of this report are estimates which compensate for instances of missing data when appropriate. In the 1981 Wisconsin Crime and Arrests report, these totals were actual totals of data reported, even when data were missing. Thus, caution should be exercised in comparing county totals of 1981 with subsequent years.

-- Both adult and juvenile 1981 arrest data for Milwaukee published in the 1981 Wisconsin Crime and Arrests have been revised. Readers interested in comparing 1981 Milwaukee data with other years are urged to contact SAC.

[1] The crime clock should be viewed with caution. Since it is the most aggregate representation of UCR data, it is designed to convey the annual reported crime experience by showing the relative frequency of Index Offense occurrence. This method of display does not imply a regularity in the commission of Index Offenses; rather it shows the ratios of crimes to fixed periods of time.

An Overview of 1986 and 1987 Crime and Arrests in Wisconsin

The following tables and maps present an overview of 1986 and 1987 crime and arrests in Wisconsin. The first table shows that reported Index Offenses have increased by 2.2 percent from 1986. While reported violent offenses have decreased by 3 percent from 1986, property offenses have increased by 2.5 percent. The overall decrease in violent offenses is due to decreases in robbery and aggravated assault. Murder increased by 11.1 percent, from 153 to 170. Rape increased by 1.7 percent, from 969 to 985. However, robbery decreased by 8.7 percent, from 3,478 to 3,175, and aggravated assault decreased by 1.3 percent, from 7,760 to 7,659. It should be noted that violent offenses constituted only six percent of Index Offenses for Wisconsin in 1987.

Property crimes comprise the balance of the Crime Index. The overall increase in reported property crimes from 1986 to 1987 is comprised of individual increases in each property offense except motor vehicle theft. Burglary increased by 8.1 percent, from 37,327 to 40,348. Theft increased by 1.5 percent, from 133,642 to 135,654. While motor vehicle theft decreased by 3 percent, from 12,168 to 11,803, arson increased by 1.7 percent, from 1,210 to 1,231.

The next two tables present a comparison of arrests, both adult and juvenile, in 1986 and 1987. Adult arrests for total Index Offenses increased by 9.7 percent, while juvenile arrests for total Index Offenses decreased by 3.8 percent. Total arrests for Index Offenses, combining both adults and juveniles, increased by 3.4 percent. Juvenile arrests constituted 43.2 percent of all arrests for Index Offenses in 1987, compared to over 46 percent in 1986. Total adult arrests rose by 10 percent, from 201,603 to 221,788 while total juvenile arrests decreased by 4.2 percent, from 91,940 to 88,103.

Juvenile arrests comprise 28.4 percent of all arrests for 1987, but they comprise 43.2 percent of arrests for Index Offenses. Among the Index Offenses, juvenile arrests comprise 19.2 percent of all arrests for violent offenses and 46.4 percent of all arrests for property offenses.

Following the set of three tables are two maps showing rates of violent and property crime in each Wisconsin county for 1987. On each map, counties are ranked in four groups according to rate of offenses per 100,000 population. The statewide rate, shown on each map, is based on the statewide number of offenses and population. This rate is within the fourth quartile because most of the highest crime rates are in those counties with largest populations.

An analysis of total Index Offenses, violent offenses, property offenses, and each separate offense appears in the following section of this report. Ten-year trends in offenses, clearances, and arrest ratios are then presented, followed by data on law enforcement officers killed and assaulted.

CRIME INDEX OFFENSES

Definition:[1] Crime Index Offenses are murder and nonnegligent manslaughter, forcible rape, robbery, aggravated assault, burglary, theft, motor vehicle theft, and arson. Attempts are included (an attempted murder is classified as an aggravated assault).

1987 Summary Analysis

- There were an estimated 201,025 Crime Index Offenses reported during 1987, a 2.2 percent increase from 1986.
- One Index Offense was reported approximately every two minutes, 37 seconds during 1987.
- The Crime Index Offense rate per 100,000 Wisconsin residents was 4,192.9 in 1987, an increase of 2.1 percent from the 1986 rate of 4,107.9 per 100,000.
- The 1987 rate of 4,192.9 per 100,000 is approximately 25 percent less than the 1987 rate of 5,599.6 per 100,000 residents for the nation.
- In terms of the population groupings of Wisconsin jurisdictions, the larger the population category, the higher the rate of Index Offenses.
- Total Index Offenses have increased by 12.6 percent between 1977 and 1987.
- An estimated total of 58,754 persons were arrested for Index Offenses in 1987. Of these, 56.7 percent were adults.
- Overall, 24 percent of Index Offenses were cleared in 1987. This rate varied widely, however, from over 90 percent for murder to 16.8 percent for burglary. Clearances involving only juveniles comprised 34 percent of all clearances for Index Offenses in 1987.

VIOLENT OFFENSES

Definition: Four Crime Index Offenses involve face-to-face confrontation between victim and perpetrator, and are referred to as violent offenses. These are murder and nonnegligent manslaughter, forcible rape, robbery and aggravated assault.

1987 Summary Analysis

- There were an estimated 11,989 violent offenses reported during 1987, a 3.0 percent decrease from 1986. This is the first decrease in the number of reported violent crimes since 1977.
- Violent Index Offenses accounted for 6 percent of the total Crime Index in 1987.
- Approximately one violent offense was reported every 44 minutes during 1987.
- The rate of occurrence for violent offenses in 1987 was 250.4 per 100,000 Wisconsin residents. This figure represents a decrease of 3.32percent from the 1986 rate of 258.6 per 100,000.
- The 1987 rate of 250.4 per 100,000 is approximately 59 percent less than the 1987 rate of 609.7 per 100,000 residents for the nation.
- In general, the 1987 violent offense rate was greater in jurisdictions with larger populations.
- Violent Index Offenses have increased 96 percent between 1977 and 1987.
- An estimated total of 6,792 persons were arrested for violent offenses in 1987. Approximately 81 percent of 1987 arrests were adults.
- Overall, 55 percent of violent offenses were cleared in 1987, compared to a 51.3 percent clearance rate in 1986. Clearances involving only juveniles comprised 15.3 percent of all violent offense clearances in 1987.

Not included in the count for this offense classification are deaths caused by negligence, suicide, or accident; justifiable homicides, which are the killings of felons by law enforcement officers in the line of duty or by private citizens during commission of the felony; and attempts to murder or assaults to murder, which are classified as aggravated assaults.

SEXUAL ASSAULT AND FORCIBLE RAPE

Definition: Sexual assault is sexual contact or sexual intercourse with another person without consent of that person. Sexual assault is proscribed under Wisconsin statutes, but is not part of the Federal Uniform Crime Reporting (UCR) Program. Forcible rape is part of the Crime Index and as such is reported as part of the Federal UCR Program. It is the carnal knowledge of a female forcibly and against her will. Assaults or attempts to commit rape by force or threat of force are also included; however, statutory rape (without force) is not included.

Sexual Assault - 1987 Summary Analysis

Information on sexual assault is vital to an understanding of crime trends in Wisconsin. Rape is not a legally meaningful category in this state. However, rape is part of the Crime Index and information on rape is vital to the national UCR program. Furthermore, many years of information on rape are available for Wisconsin, and current information on rape is valuable for purposes of comparison. A table comparing rapes in Wisconsin for 1986 and 1987 appears on the following page. Furthermore, jurisdiction-by-jurisdiction listings for rape appear in Tables 1 through 6 at the end of this publication. This listing of rape will continue in future years as long as rape continues to be part of the Crime Index.

Following are some highlights of the tables on the following four pages.

- There were an estimated 5,125 sexual assaults reported during 1987, a 4.1 percent decrease from the 1986 total of 4,342.
- Approximately 19 percent of all sexual assaults were rapes. For victims over 16, the proportion of rapes was more than twice as high, approximately 41 percent.
- Approximately 73 percent of all sexual assault victims were juveniles. Half of all victims were 14 years old or less; the average age for all victims was 15 years.
- Victim sex was 87 percent female, while offender sex was 96 percent male.
- Nearly 69 percent of all sexual assaults were committed by family members, friends and acquaintances, while 17 percent were committed by strangers. For those sexual assaults that are rapes, nearly 51 percent were committed by family members, friends and acquaintances, and 35 percent by strangers.

Sexual Assaults

Summary data on sexual assaults are presented in the following tables and graphs. In the tables below, sexual assaults are shown by degree for all victims, victims 15 and under, and for victims 16 and over. This is because the two most severe degrees of assault, first and second, may be so classified either by the nature of the assault or the age of the victim. Looking only at assaults of victims age 16 and over shows the distribution of assaults by degree based solely on the nature of the assault, not victim age. Most sexual assaults, even first and second degree assaults, are not rapes in the Uniform Crime Reporting definition, and this also is shown in the table below.

Graphs showing the age and sex of victims and offenders, and relationship between victim and offender, are presented on subsequent pages. Data are also presented on arrests, victim injury, and weapons used in the commission of sexual assaults.

Summary of Offense and Arrest Trends: 1977 - 1987

The following four tables present statewide data on: (1) the number of Index Offenses, (2) offense rates for Index Offenses, (3) clearance rates for Index Offenses, and (4) the ratio of arrests to offenses for Index Offenses for each year from 1977 through 1987. Each table shows the percent change from 1977 to 1987. Certain adjustments, noted in footnotes to each table, were made in the total Crime Index and property offense categories to make the data comparable from year to year.

The total number of known Index Offenses in Wisconsin increased from 1977 through 1981, declined through 1985, and rose in 1986 and 1987 (see graph, page 14). The number of Index Offenses increased by 12.6 percent for the decade, from 177,350 in 1977 to 201,025 in 1987[1]. The increase in offense rates for the decade is less than the increase in number of offenses, because the population of the state increased during this period.

The number of violent offenses increased by 96 percent for the decade, from 6,117 in 1977 to 11,989 in 1987. The number of property offenses increased by 9.7 percent for the decade, from 171,233 to 189,036. Thus, while both violent and property offenses have increased during the past decade, the rate of increase has been much greater for violent crimes, especially since 1981. This is made clear in the graphs on pages 20 and 26.

While the clearance rates for all Index Offenses has increased since 1977, overall Violent Offense clearance rates have declined while Property Offense clearance rates have increased. Clearance rates increased during the decade for murder and rape. However, clearance rates for robbery and aggravated assault have decreased. Among the property offenses, clearance rates have increased for theft while they decreased for burglary and motor vehicle theft.

Overall, arrest ratios have increased over the past decade, indicating that during this time arrests have increased more rapidly than offenses. However, in terms of specific offenses, this is true only of murder, forcible rape and theft. For these three offenses, arrests have increased more rapidly than offenses during the decade.

As noted in the footnotes to the tables, the 1987 Total Index and property offense figures include arson data but, since the 1977 data do not include arson, the 1977 to 1987 percent change figures exclude 1987 arson offenses.

Law Enforcement Officers Killed and Assaulted

The following tables present statewide information on law enforcement officers killed or assaulted during 1987. During 1987, three Wisconsin police officers were killed due to an accident while in the performance of duty.

There were 889 reported assaults on police officers in 1987, a 4.5 percent increase compared to the 851 reported assaults in 1986. Of the 889 reported assaults, 864 or 97 percent were cleared. Over 64 percent of assaults occurred during the nighttime hours from 8 p.m. through 4 a.m. Injuries resulted from 53 percent of reported assaults, while 95 percent of assaults involved personal weapons (hands, feet or fists) rather than firearms, knives or other dangerous weapons. Finally, the tables show both the type of assignment and type of activity at the time the assault occurred.

Index Offenses by County and Municipality - 1987

Table 1 shows Index Offenses for 1986 and 1987 and percent changes from 1986 to 1987 for each jurisdiction. The four violent Index Offenses are totaled to equal violent crimes, and the four property Index Offenses are totaled to equal property crimes. The Crime Index is the sum of all eight offenses.

In Table 1 the number of months of data reported for each jurisdiction is listed. This information is vital to the interpretation of the table, since the data presented are the reported data at the jurisdiction level, even when fewer than 12 months of data were available. Twelve months of data were reported for 96 percent of the jurisdictions. Data for jurisdictions reporting less than four months are not printed. Estimates for these jurisdictions are however included in county and state totals (see below). There were thirteen of these jurisdictions in 1987.

Data for a jurisdiction which reported for fewer than 12 months in 1987 cannot be directly compared with that jurisdiction's 1986 data or with data for other jurisdictions. Thus, no percent changes are shown for these jurisdictions. However, an approximate comparison can be made using an estimate of the 12 months total. This estimate can be calculated by multiplying the available data by a correction factor which is obtained by dividing 12 by the number of months reported. (For example if nine months of data are available for an agency, the data can be estimated for 12 months by multiplying the data by 12/9 or 1.33.) However, the accuracy of this approximation diminishes when only a few months of data are available. It should be applied with great caution when less than six months of data are available. This method should also be applied with caution when the number of offenses involved is small. For example, if jurisdiction A had 72 thefts in nine months and prorated them to 96 (12/9 x 72 = 96) thefts for the year, while jurisdiction B had three thefts in nine months and prorated them to four thefts for the year, the estimate for jurisdiction A would be more reliable because it had a higher number of offenses.

The percent change in the number of Index Offenses reported from 1986 to 1987 is shown in Table 1 for each jurisdiction for which it was possible to calculate the change. The percent change is calculated using the formula:

$$\frac{\text{(Offenses in 1987) - (Offenses in 1986)}}{\text{Offenses in 1986}} \times 100 = \text{Percent Change}$$

If the number of offenses for 1986 was zero, no percent change was calculated since percent change cannot be calculated from a zero base. In addition, as stated above, no percent change was calculated for a jurisdiction unless 12 months of data were available for both 1986 and 1987.

Table 1 shows county totals for each offense and percent change from 1986 to 1987. For those counties in which not every jurisdiction reported 12 months of data for 1986 or 1987, the county totals shown are estimates. The estimated county totals were obtained by summing the estimated annual totals for each jurisdiction within the county. These estimated annual totals were obtained as described above, by multiplying the available data by a correction factor for jurisdictions with four months or more of 1987 data. When less than four months of data were present, a different method of estimation was used. For these jurisdictions, the estimate was based on the latest year of complete data, updated based on average change experienced by agencies of similar size. When estimates are used for county totals, the totals are so labeled in Table 1 (e.g., the notation "(EST)" follows the total for Barron County).

At the end of Table 1, statewide totals of reported offenses in each category and estimates of the actual statewide totals are shown. The statewide estimates were obtained by summing the estimated offenses for each jurisdiction.

Table 2 presents offense rates per 100,000 population for Index Offenses for each jurisdiction. The populations shown in this table are from Official Population Estimates for 1987, published by the Demographic Services Center of the Wisconsin Department of Administration. The population shown for each county sheriff's office is the total population of the county minus the populations of any municipalities in the county for which UCR data were reported separately. The rates shown in Table 2 are derived by taking the number of reported offenses, shown in Table 1,

dividing by the population of the jurisdiction, shown in Table 2, and multiplying by 100,000. These rates permit comparisons among jurisdictions of different sizes.

As discussed in connection with Table 1, 12 months of data were available for 96 percent of jurisdictions. Since offense rates based on less than 12 months of data would be misleading, Table 2 presents rates only for those jurisdictions which reported 12 months of data. The countywide and statewide rates shown in Table 2 are based on estimated numbers of offenses when necessary, as described in connection with Table 1.

Table 3 presents total clearance rates by offense and jurisdiction. Note that the 1981 edition of Wisconsin Crime and Arrests showed both total and juvenile-only clearance rates in Table 3. Since then, however, Table 3 has presented only total clearance rates, while clearance rates for juveniles are shown separately in Table 4.

In Table 3, the total clearance rate is the number of clearances, divided by the number of offenses and multiplied by 100. That is, clearances are represented as a percentage of reported offenses. Note that no clearance rate can be calculated for an offense category if there are no 1987 offenses reported, even though clearances may be reported from prior years. When no offenses have been reported, a blank space appears in Table 3. When a clearance rate of zero is shown it means that at least one offense occurred, but that there were no clearances.

Since the clearance rate is the ratio of clearances to reported offenses, it is not particularly sensitive to the problems of missing data described above for Tables 1 and 2. It is reasonable to assume that this ratio would be fairly constant as long as the number of months of data available was reasonably large. Thus, clearance rates have been presented in Table 3 for all jurisdictions for which six months or more of clearance data were present. There were nine jurisdictions reporting fewer than six months of data which were excluded from the table. An asterisk (*) is printed next to the name of each of these jurisdictions.

Countywide and statewide rates shown in Table 3 are based on estimated clearances and offenses, calculated as described above in connection with Table 1. Since county estimates could be misleading if a large proportion of data were missing, they are not printed for those counties in which jurisdictions with less than six months of data make up more than a third of the county population. An asterisk (*) is printed when county estimates are omitted for this reason.

Table 4 presents information on those clearances in which only juveniles were involved. In Table 4, juvenile-only clearances are presented as a percentage of all clearances for each offense. Note that this is different from the definition used in the 1981 edition of Wisconsin Crime and Arrests, when juvenile-only clearances were presented as a percent of offenses. In the reports since 1981, the practice used in Wisconsin Crime and Arrests through 1980 is resumed and juvenile-only clearances are presented as a percent of total clearances. In Table 4, when a clearance rate of zero is shown, it means that there was at least one clearance, but there were no juvenile clearances. When no clearances at all have been reported, a blank space appears in the table. In all other respects, Table 4 is constructed in the same way as Table 3, and all comments regarding Table 3 are relevant to Table 4.

'*' INDICATES THAT REPORTS ARE PRESENT FOR FEWER THAN 6 MONTHS

Arrests by County and Municipality - 1987

Tables 5 through 8 present data on adults and juveniles arrested by Wisconsin law enforcement agencies during 1987. The tables present the total number of arrests, the total numbers of Part I and Part II arrests, and the number of arrests for each Part I and Part II offense separately, for each reporting agency. Information on adults is presented in Tables 5 and 7, information on juveniles in Tables 6 and 8.

As indicated in the introduction to this report, data are not available for all 12 months of 1987 for every reporting agency. In the following tables, as in Tables 1 through 4, the number of months of data available for each reporting agency is listed. Although only the known data are presented for each jurisdiction, an estimated yearly total can be calculated for any jurisdiction with less than 12 months of data reported. The estimated totals can be calculated by multiplying the number in the table by a correction factor which can be obtained by dividing 12 by the number of months of data reported. (Thus, if 11 months of data are presented for an agency, for example, the agency's figures should be multiplied by 12/11, or 1.09). Naturally, the more months of data reported, the more accurate will be the yearly estimates. Estimates based on a small number of months of reported data should be interpreted cautiously.

The following tables show, for each county, county total arrests for each offense. For those counties in which not every jurisdiction reported 12 months of data for 1987, the county totals shown are estimates. These estimates were obtained as in Table 1, by calculating and summing the estimated annual total for each jurisdiction within the county. As in the previous table, when estimates are used for county totals, the notation "(EST)" follows the "County Total" label.

At the end of each table there are statewide totals of the reported arrests in each category and estimates of the actual statewide totals. The estimated totals were obtained by calculating the estimated yearly totals, as described above, for each reporting agency with less than 12 months of data and summing the estimates for these agencies and the reported figures for the other agencies.

These tables also contain population figures for each jurisdiction. Tables 5 and 7 contain adult population figures. Tables 6 and 8 contain juvenile population figures. These adult and juvenile figures were derived from the 1987 Department of Administration (DOA) population estimates, Official Population Estimates for 1987, using adult and juvenile population proportions provided in the 1980 census and updated with 1983 DOA estimates. The population figures presented for county sheriffs' offices are the county populations minus the populations of any municipalities in the county for which UCR data are reported separately. These figures can be used to calculate arrest rates for any of the jurisdictions in the State. Arrest rates are calculated by dividing the number of arrests by the relevant population and multiplying the result by 100,000. This rate per 100,000 is comparable across jurisdictions of varying sizes.

Statewide Arrests, by Offense

The first and second of the following tables present statewide data on adult and juvenile arrests in Wisconsin during 1987. Like other state and county level data presented in this report, these tables present estimated totals. Note that the state total in these listings differs slightly from the corresponding totals shown in Tables 5 through 8. This is because of small differences in the procedure used to make estimates of missing data in the two types of tables.

Statewide Supplementary Offense Information

The third table, Property Stolen and Recovered by Type of Property, shows the monetary value of property both stolen and recovered by category of property. The table also shows the percent of value recovered for each type of property.

Number of Full Time Law Enforcement Employees in Wisconsin as of 31 October, 1987

The data in this table come from a yearly survey conducted each fall by the Federal Bureau of Investigation. For every jurisdiction, it shows the number of sworn law enforcement employees, the number of civilian employees, and the total number of employees for every UCR jurisdiction. In addition, the table lists the total population for each jurisdiction, and both the number of law enforcement employees and the total number of employees per 1,000 population. It should be noted that the large figures for officers per 1,000 population for the Milwaukee County Sheriff are misleading since they reflect a very different situation from that of most law enforcement agencies.

GLOSSARY

ADULT: A person 18 years of age or older.

ARREST: Taking into physical or other legal custody for commission of an offense in the local reporting jurisdiction. An arrest has occurred when a law enforcement officer detains a person with the intention of seeking charges against them for a specific offense and a record is made of the detention (see p. 60, Uniform Crime Reporting Handbook). Arrests for all criminal offenses are scored. Arrests for ordinance violations are included. Arrests for traffic offenses, with the exception of driving under the influence of intoxicants, are not scored. Included are those persons released without having been formally charged. (See Juvenile Arrest.)

ARREST RATE: The number of arrests for a particular offense, or group of offenses, per 100,000 population. The formula is:

$$\frac{\text{Number of Arrests}}{\text{Population}} \times 100{,}000$$

Arrest rates per population unit are employed to remove the effects of differing sizes of law enforcement service areas, permitting the examination of arrest on an equalized population basis. "Per 100,000 population" is generally utilized to preclude rates for infrequently occurring arrests from being expressed as unmeaningfully small numbers.

CLEARANCE: An offense is cleared, or solved for crime reporting purposes, when at least one person is arrested, charged with commission of the offense and turned over to the court for prosecution. Provision is also made for clearance in certain "exceptional" situations (see p. 42, Uniform Crime Reporting Handbook).

CLEARANCE RATE (TOTAL): The number of clearances divided by the total number of offenses, expressed as a percent. The formula is:

$$\frac{\text{Number of Clearances}}{\text{Number of Offenses}} \times 100\%$$

Offenses are reported as they become known to law enforcement agencies. Clearances are scored as they are made. Therefore, it is possible for the clearance rate to exceed 100 percent for a time period. Both clearances by arrest and exceptional clearances are included.

CRIME FACTORS: Historically, the causes and origins of crime have been the subjects of investigation by many disciplines. No definitive conclusions have yet been reached; many factors affect the volume and type of crime that occurs from place to place. Caution should, therefore, be exercised in comparing statistical data of individual communities or counties solely on the basis of their populations.

More appropriate use can be made of the statistics by relating the experience of a particular area to group averages, or by employing a ranking procedure, and encompassing both crime and other socio-economic information.

CRIME INDEX: The total of eight serious offenses used as an indicator of crime. Crime Index offenses are murder and nonnegligent manslaughter, forcible rape, robbery, aggravated assault, burglary, theft, motor vehicle theft and arson. The first four of these are referred to as violent crimes, and the latter four as property crimes. Definitions of each of these offenses are given in the section "Statewide Index Offenses and Arrests."

JUVENILE: A person 17 years of age or younger.

JUVENILE ARREST: For purposes of Uniform Crime Reporting, a juvenile should be counted as "arrested" when the circumstances are such that if he or she were an adult, an arrest would be tallied (see Uniform Crime Reporting Manual, p. 60). All violations by juveniles where some police or other official action is taken beyond a mere admonishment, including status offenses, are included. Law enforcement contacts with juveniles where no offense has been committed are not scored as arrests. Juveniles taken into custody for their own protection, such as in neglect cases, are not scored as being arrested if they have not committed an offense. (See Arrest)

JUVENILE CRIME: Two different measures are available through Uniform Crime Reporting. They are juvenile arrests (number, rate, and percentage of total arrests), and juvenile involvement in clearances (juvenile clearance rate).

JUVENILE INVOLVEMENT IN CLEARANCES: The percent of clearances for a given offense involving only juveniles (see Table 4). The formula is:

$$\frac{\text{Number of Clearances Involving only Juveniles}}{\text{Total number of clearances}} \times 100\%$$

OFFENSE RATE: The number of known offenses per 100,000 population. The formula is:

$$\frac{\text{Number of Offenses}}{\text{Population}} \times 100{,}000$$

Offense rates per population unit are employed to remove the effect of differing sizes of law enforcement service areas, permitting the examination of reported crime on an equalized population basis. "Per 100,000 population" is generally utilized to preclude the rates for infrequently occurring offenses from being expressed as unmeaningfully small numbers.

More specific crime or victimization rate measures may also be utilized, such as residential burglaries per 100,000 residences, motor vehicle thefts per 100,000 registered vehicles, or forcible rapes per 100,000 females in typically victimized age groups.

PART I OFFENSES: The eight index crimes plus manslaughter by negligence.

PART II OFFENSES: All crime categories not already designated as Part I, excluding minor traffic violations.

PERCENT CHANGE: The formula is:

$$\frac{\text{Value in Current Period - Value in Base Period}}{\text{Value in Base Period}} \times 100\%$$

POPULATION: Totals as well as juvenile and adult sub-totals are based on Official Population Estimates for 1987, Wisconsin Department of Administration, Demographic Services Center.

STATUS OFFENSES: Offenses which are only offenses when they are committed by a juvenile. For purposes of the Wisconsin UCR Program, status offenses consist of curfew violations, runaways, and liquor law violations.
